Outline of our Project

- Introduction
- Objective
- Requirement of the project
- Output of the Project
- Advantage
- Limitations of this project
- Future Plan
- Conclusion

Introduction

- This project is mainly used for medical stores to maintain the details of medical store such as stock and account.
- This medical shop management software is so designed as to ease the work load of medical shop professionals to find out the medicine form the stack.
- The main feature includes inventory and stock control, accounting and company details.

Objective

- As this is a simple software can be easily used by the retailers and wholesalers to automate the process of manually maintaining the records.
- Whenever user need to update if any missing information there is an update option.
- Delete option is used for any redundant information which not need for the owner.
- This software show the warning of expire date of medicine.

Objective

- So that organization can manage their record in efficient and organized form.
- The main goal of this project is to maintain the records of purchase , sale and stock details with cash transaction maintenance.
- Medical store management software is very needy for Medical Store. This software help the shop owner to maintain day to day transaction in computer.

Requirement of the Project

NetBeans

Java Language

Server XAMPP

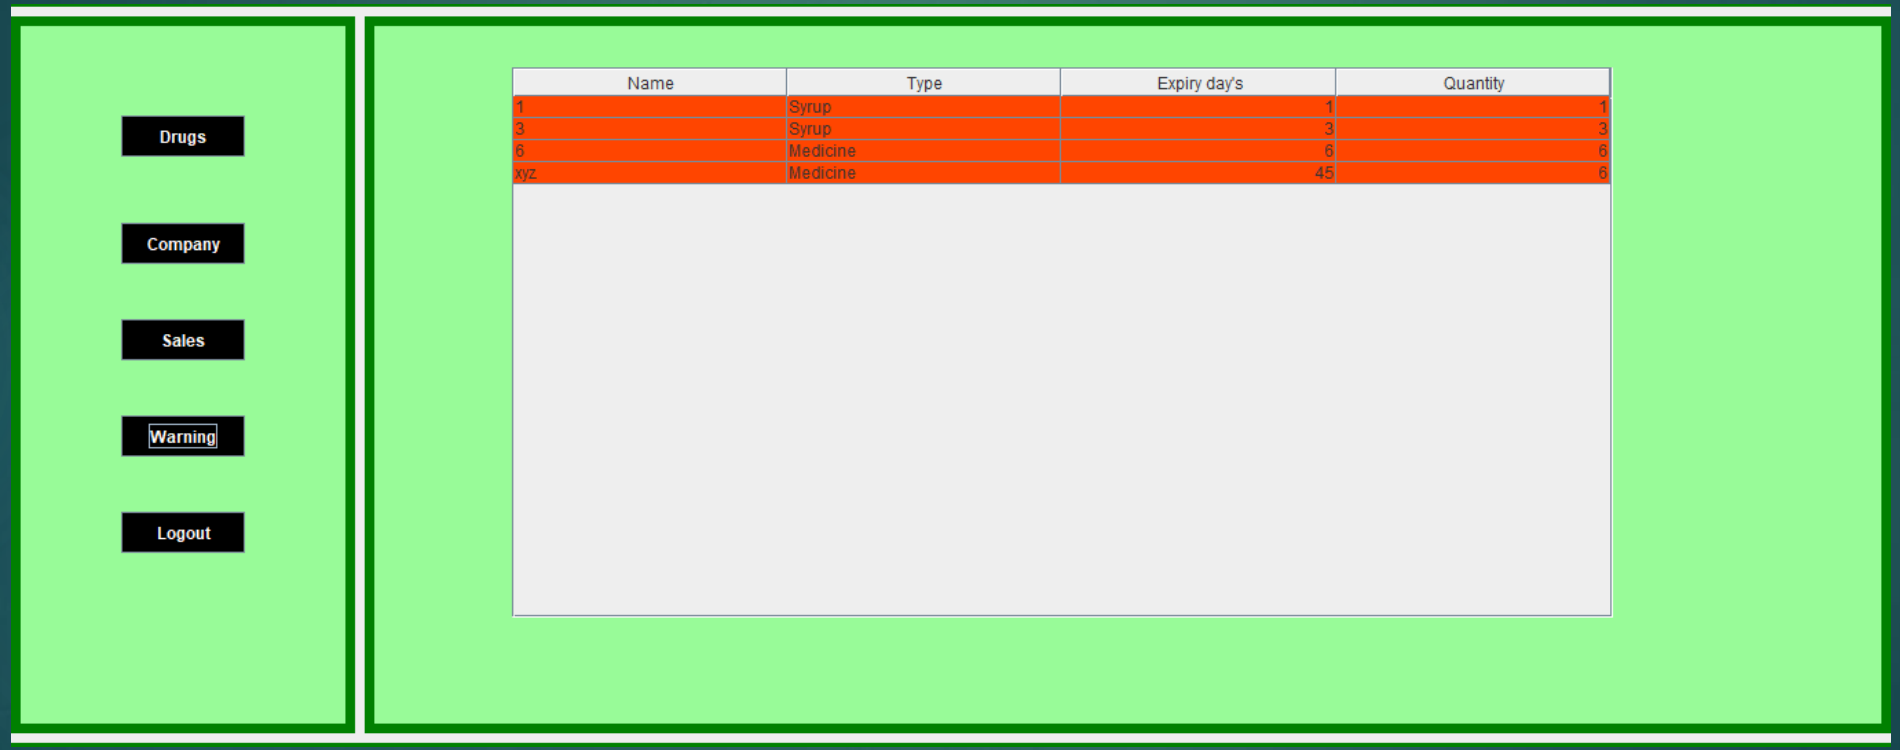
Warnings of Drugs



Advantages

- Easily find out any medicine on a fixed stack where it keep.
- Don't require more labour cost.
- Save time.
- Easily know the quantity of drugs , its expire date.
- If any information need to change this has update option.
- For any contract it has company name and their mobile number.
- Can easily calculate the total price of drugs.

Limitations of this project

- This software only build for the shop owners so customers can't take any advantage.
- It's security system is very simple as it build only for the normal user who haven't much knowledge about computer.
- Their have not any discount offer for the registered customer.
- Problem to Maintain record of monthly and yearly transactions.

Future Plan

- In future we update our project so that customer can also use this project.
- We will put the option of discount for the registered.
- Must work for strong security system.
- We will add the calculate of net profit and loss option so that owners can easily get idea about his plan of work.

Conclusion

- Though the drawback of existing system this will give a lot of benefits which consists quick relation between owners and the company.
- This system save time and money.
- Unexpired medicine easily identify which is harmful for health.
- This system is simple and it would make everyone works to become easier.

THANK
YOU!
